**REQUEST FOR QUALIFICATION(RFQ)
PROFESSIONAL SERVICES
UNDERGROUND UTILITY LOCATING SERVICES
ADDENDUM NO. # 2**

DRAWINGS/FORMS

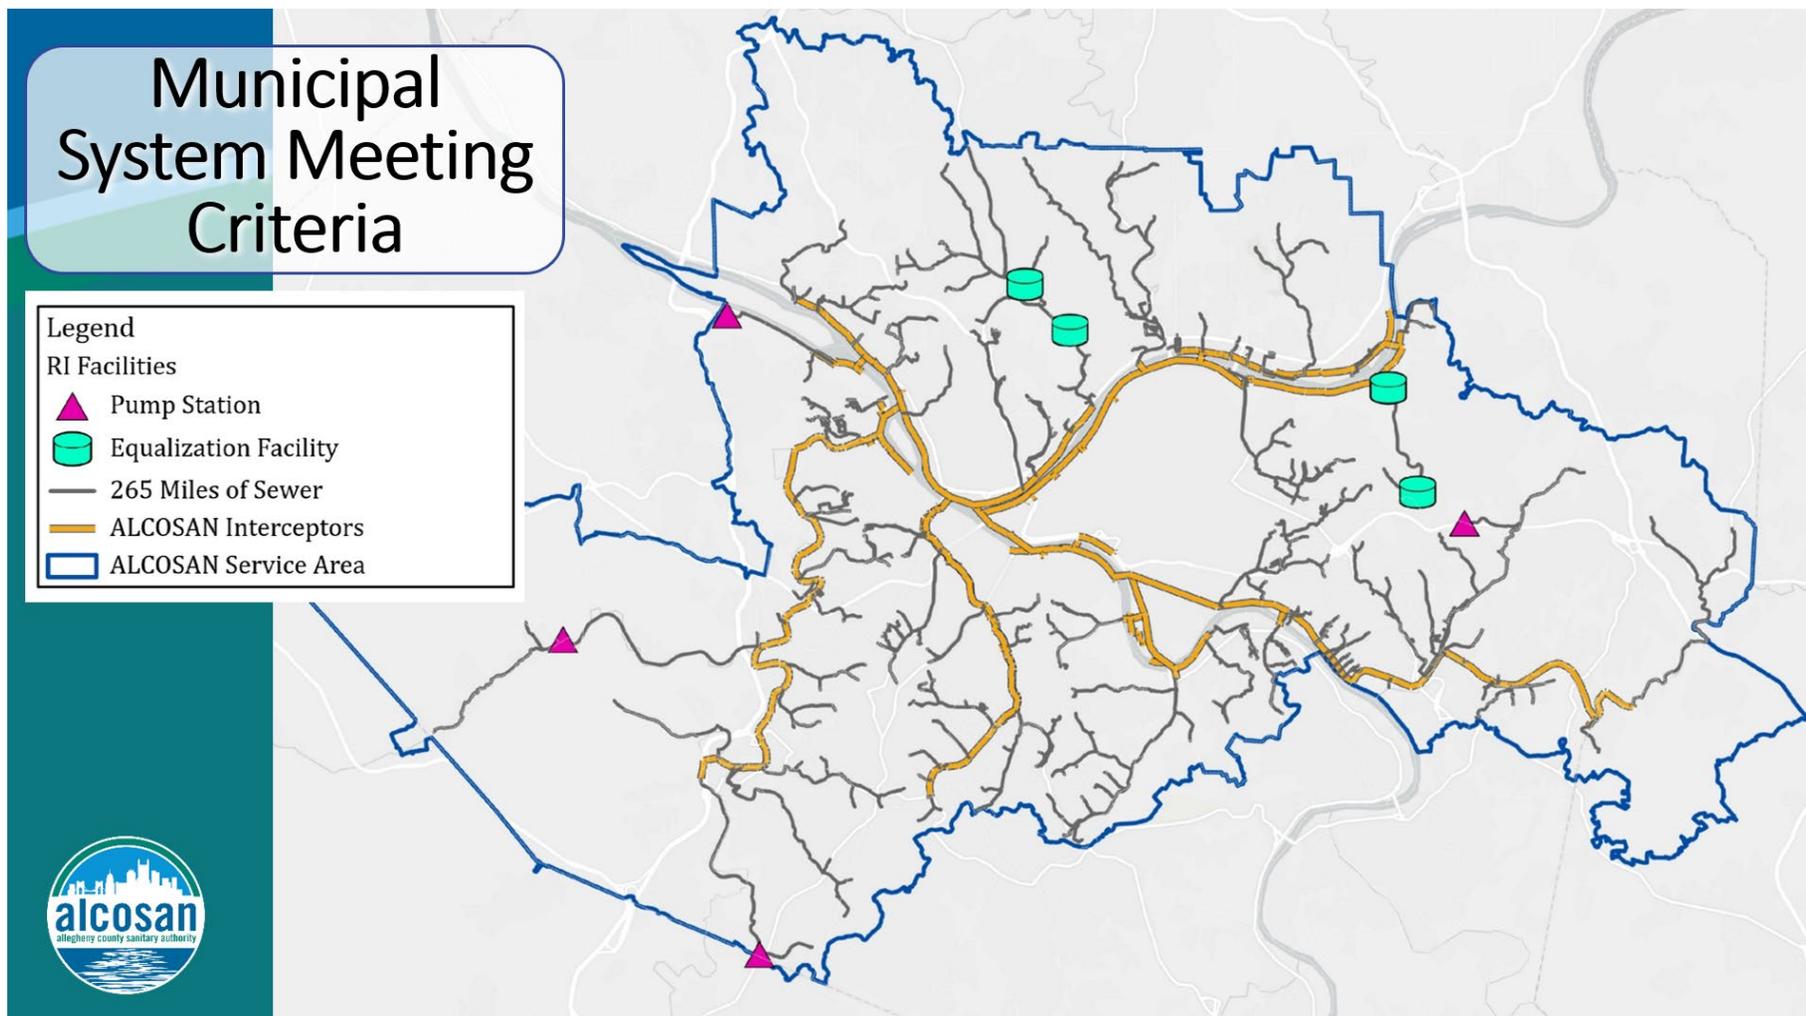

1. None

INFORMATIONAL

The following Questions have been submitted under this procurement.

1. Regarding the Regionalization Program: Can you provide any information on which municipal systems ALCOSAN will be acquiring?
Response: To date, ALCOSAN has transferred approximately 17 miles of trunklines (highlighted in purple). We anticipate that number increasing to nearly 50 miles of transferred trunklines in the coming year. ALCOSAN will provide an update during the contract on the expected trunklines to be transferred in 2024.
2. Can you provide approximate ticket volumes for these systems?
Response: There could be up to an additional 1000 tickets generated in the coming year.
3. Is having a physical office in Allegheny County a requirement?
Response: The proposer must clarify how it will react to local areas in a timely manner in the event a site visit is required. The vendor should have an office in Allegheny County, and it will count toward their ultimate evaluation.
4. What methods of locating are expected to be used? Many sewers aren't locatable using surface geophysics (EM locators, GPR, etc.). Will the contractor be expected to use CCTV equipment or sondes? Will line of sight and GPS coordinates be used?
Response: The proposer shall assume all methods of locating sewers will be used.

Eligible Sewers and Facilities

Sewers Transferred and in the Queue
